

## ARMOUR DIGITAL LIGHTNING EVENT COUNTER

5 Digits  
Digital type  
25 Years Warranty  
IP-67 Resistance  
Wire/Strip Grounding  
Hard Plastic Box

ARMOUR  
DIGITAL  
LIGHTNING  
STRIKE  
COUNTER

This is a part of the lightning protection system which registers the lightning impulse strikes captured. This works on the principle of electro magnetic induction caused by the lightning current. ARMOUR is a digital meter and can register a maximum strike count of 9999. ADLEC is very light weight and very easy to install. ARMOUR can be used with both Conventional and ESE type lightning protection systems. The enclosure protecting the lightning event counter is of IP65 grade and is UV resistant and does not require a external power source.
